#### **Data Sheet**

# High Speed Modular Data Acquisition Recorder DAS1800

With 10 slots for input modules, the DAS1800 can be configured for a wide variety of applications. Choose from 3 input modules with 4 or 8 channels each to achieve the optimal channel configuration. Acquire data from any sensor with a voltage or current output (with shunt), or directly measure voltage, resistance, or temperature using thermocouples or resistance temperature detectors (RTDs).

For capturing rapidly changing signals and transients, the DAS1800 can simultaneously measure and record up to 40 channels at I MSa/s/ch and stream the data directly to the solid-state drive. For slow changing parameters, the D18-MUX8 multiplexed module provides 8 inputs per module (up to 80 channels per system).

With four configurable sampling rates and advanced triggering options, the DAS1800 can record trends at low sample rates and transients at higher rates. It also comes with a 2 TB solid-state drive standard, providing the longest recording time of any data acquisition recorder on the market. To gain portability, you don't have to give up features and performance with the DAS1800. Weighing about 15 lbs (6.8 kg), the battery configured base unit is the lightest all-in-one system in its class. Modules are also lightweight, only adding around 1.2 lbs (0.55 kg) each. The DAS1800 features a large 15.6" Full HD touch screen display for easy setup and visualizing real-time or recorded data, and the optional internal battery provides up to 3.5 hours of battery operation (1.5 hours with 10 D18-UNI4 modules) for testing in the field.

The highly intuitive user interface of the DASI800 makes it easy to use with a multitude of time saving features such as one finger scrolling, pinch and zoom, and a built-in sensor library. The DASI800 also provides several options for visualizing your measurement data. View measurements as real-time waveforms and numeric values on customizable dashboards.

For viewing data on a PC, download our free DASpro software. For remote control, the DAS1800 supports web server and VNC connections.

#### Features and benefits:

- Stream 40 channels at I MSa/s/ch
- Up to 80 analog inputs with D18-MUX8 multiplexed module
- Measure up to  $\pm$  600 VDC
- I0 slots and 3 measurement modules available
   Universal (4 ch)
  - Multiplexed (8 ch)
  - High Impedance (4 ch)
- Temperature measurements with thermocouples and RTDs
- Store sensor information and parameters in the sensor library
- Simultaneous recording at multiple sample rates (up to 4)
- Internal signal conditioning with analog and digital filters
- 15.6" Full HD touchscreen display
- 2 TB internal SSD (standard)
- Advanced calculations and automatic measurements
- Battery option (up to 3.5 hours of operation)
- I6 digital input channels (24 V) and 4 digital outputs
- Dedicated power outputs for sensors with +3.3 V, +5 V, +12 V, or +24 V excitation voltages
- Interfaces include USB 3.0 (x2), USB 2.0 (x2), LAN I Gbps (xI), and HDMI (xI)
- Rugged carrying case included

#### Applications

- Measure and record up to 80 analog channels
- Monitoring of processes and equipment
- Product validation and verification

**HDMI output** 

#### **Top panel**

Standard 10 module slots Easily configure system with plug & play modules

Image displays a DAS1800 configured with 3 universal modules and 3 multiplexed modules.

**USB host ports** 

High Speed Modular Data Acquisition System DAS1800

#### **Operation highlights**

#### **Channel configuration**

The channel configuration menu offers an intuitive design to ease measurement setup. The connection diagram changes to display wiring information for the measurement type and sensor selected.

#### Advanced triggering

Configure the trigger settings to start and stop acquisition manually, at a specified time, or through a combination of one or multiple channel(s).

#### **Custom dashboards**

Measure and visualize data as real-time waveforms and numeric values on a customizable dashboard. Import circuit diagrams or system images to display on the dashboard.

#### Waveform measurements

Automatically calculate up to 19 different waveform measurements including, amplitude, RMS, mean, frequency, rise time, and fall time.

Reduce unwanted noise with built-in analog and digital filters. Analog filters include 100 Hz, 1 kHz, and 10 kHz low-pass filters. Digital filtering includes a user-definable low pass filter between 10 mHz to 10 kHz.

#### Simultaneous recording

Record data at up to 4 different user configurable sample rates simultaneously. Allocate channels to slower rates or higher rates on a per channel basis for efficient use of hard drive space.

#### Filtering

High Speed Modular Data Acquisition System DAS1800

#### The tools you need

#### Sensor library

**DASpro (PC software)** 

The DAS1800 provides a library of common sensor configurations to facilitate channel setup. Users can also add to the library by creating a new sensor with user-defined parameters including, name, units, and conversion function.

#### 2 TB SSD

The DAS1800 provides the longest recording time of any data acquisition on the market with a 2 TB solid state drive that comes standard. Store waveform recordings, configuration files, and screenshots.

#### **Remote connectivity and PC software**

The DASpro software is a license free software that can be downloaded from bkprecision.com. Using this software, users can open and view the universal ASAM MDF4 file recordings saved by the DAS1800. Viewing data and analysis features are similar to the DAS1800, making it easy and intuitive to operate.

The DAS1800 provides an internal web server for remote access through any device on the same network. Configure instrument channels and trigger parameters, initialize acquisition, and easily save and transfer files to a local storage system.

# Virtual Network Computing (VNC) capability

The recorder's built-in VNC provides a graphical desktop system to remotely control the instrument from a computer with a full graphical interface that replaces the instrument's front panel using a mouse and keyboard.

#### File Transfer Protocol (FTP)

Access remotely the internal hard drive of the recorder to drag and drop the recording files into your desktop.

High Speed Modular Data Acquisition System DAS1800

#### **Measurement Modules**

Configure the DAS1800 to fit your needs with any combination of modules up to 10.

#### Included accessories

Bare wire to banana adapter<sup>1</sup> (Set of 4 pairs)

SUB-D 25 pin connector for digital inputs and alarms

4 pin screw terminal block<sup>2</sup> (Set of 8),

SUB-D I5 HD pin connector for timing and synchronization I/O

Rugged case

8 pin screw terminal block for power rail supply

(I) A set of bare wire to banana adapters is provided with every universal and high impedance module purchased. (2) A set of 4 pin screw terminal blocks is provided with every multiplexed module purchased.

#### **Optional accessories**

Digital channel patch cord

Isolated digital channel board

**Specifications, base unit** Note: All specifications apply to the unit after a temperature stabilization time of 30 minutes over an ambient temperature range of 23 °C  $\pm$  5 °C.

	Pt1000	0.1 mA	
Temperature Range	-200 °C to +850 °C (-328 °F to I562 °F )		
Wiring	2 wires	Max. corrective resistance 50 $\Omega$	
	3 wires	Max. 3-wire resistance, 50 $\Omega$	
	4 wires		
Measurement Range (7 Ranges)	± 10 °C, ± 25 °C, ± 65 °C, ± 130 °C, ± 200 °C, [-200 °C, +380 °C], [-200 °C, +850 °C]		
Accuracy	3 wires	0.1% of the range $\pm$ 0.3 °C	
	4 wires	$\pm$ 0.1% of the range $\pm$ 0.2 °C	

(I) Direct measure taken on DMM at I0 (50 Hz) / I2 (60 Hz) NLPC (200 ms) and full bandwidth

(2) Measure  $\pm$  short circuit termination to 50  $\Omega$  on chassis during I sec at the fastest acquisition speed and full bandwidth

Temperature (Thermocouple)					
Compute Frequency	4 ms				
Cold Isration	Uncompensated, internal, external (other channel)				
Cold Junction	Accuracy <sup>3</sup> : ± 1.25 °C				
	J -210 °C to 1200 °C (-346 °F to 2192 °F)				
	К	-250 °C to 1370 °C (-418 °F to 2498 °F)			
	Т	-200 °C to 400 °C (-328 °F to 752 °F)			
Turno	S	-50 °C to 1760 °C (-58 °F to 3200 °F)			
Туре	В	200 °C to 1820 °C (392 °F to 3308 °F)			
	E	-250 °C to 1000 °C (-418 °F to 1832 °F)			
	Ν	-250 °C to 1300 °C (-418 °F to 2372 °F)			
	R	-50°C to 1768°C (-58 °F to 3214 °F)			
Resistance					
Compute Frequency	4 ms				
	2 wires	Max. corrective resistance 50 $\boldsymbol{\Omega}$			
Wiring	3 wires	Max. 3-wire resistance, 50 $\Omega$			
	4 wires				
Measurement Range (4 Ranges)	300 Ω (I mA), I500 Ω ( 0.5 mA), 5k Ω (0.2 mA), I0 kΩ (0.1 mA)				
Accuracy	$\pm$ 0.1% of the range $\pm$ 0.1 $\Omega$				
Time and Counting					
Threshold	Set by user, auto				
Minimum Pulse Width	l ms				
Counter	32 bits				
Other					
Current	Through shunt or clamp				
Sensor	0 to 10 V, 4 to 20 mA (with external shunt), other user defined settings				

(3) Only when cold junction adjustment has been performed after installing a new module. Otherwise accuracy is ±3 °C

#### **Ordering Information**

#### Step 1:Select base unit model and factory options

Models	Description
DAS1800 (base unit)	The DAS1800 base unit includes the following standard; 10 module slots, 2 TB SSD, 16 digital channels, SUB-D 15 HD pin connector for external triggering and synchronization, 5 W power rail, 15.6" TFT LCD Full HD (1920 x 1080), USB 3.0 (x2), USB 2.0 (x2), 1 Gbps LAN (x2), and HDMI (x1) interfaces
DAS1800-BAT	Includes the DAS1800 base unit with a non-removeable Lithium-ion battery providing up to 3 ½ hours of continuous use
Factory Options	Description
DI8-FLE	Fanless version of the DAS1800 base unit

Note: D18-FLE is not compatible with a DAS1800-BAT.

## Step 2: Determine the number and type of measurement modules for your application. Select up to 10 modules.

Module	Channels	Measurements	
Universal (D18-UNI4)	4	Voltage, current (shunt), temperature (thermocouple), frequency, PWM, TRMS	
High Impedance (D18-HIZ4)	4	Voltage, current (shunt), temperature thermocouple), frequency, PWM, TRMS	
Multiplexed (D18-MUX8)	8	Voltage, current (shunt), resistance, temperature (RTD), temperature (thermocouple)	

Note: Refer to the measurement modules and specifications sections for additional information.

#### Step 4: Contact us

#### **B&K Precision:**

For inquiries and assistance configuring your DAS1800, please fill out the DAS1800 Order Request Form.

Or, visit our where to buy page at <u>bkprecision.com</u> to view a list of authorized vendors.

#### Step 3: Select your accessories

Accessory	Part Number
Isolated digital channel board	917008000
Digital channels patch cord	902407000
Replacement 4 pin terminal block, pack of 8	GCM5P
Replacement quick-connect banana plug, 4 pairs	TLQ2B
Replacement DAS1800 hard case	LCLDR

### About B&K Precision

For more than 70 years, B&K Precision has provided reliable and value-priced test and measurement instruments worldwide.

Our headquarters in Yorba Linda, California houses our administrative and executive functions as well as sales and marketing, design, service, and repair. Our European customers are most familiar with B&K through our French subsidiary, Sefram. Engineers in Asia know us through our B+K Precision Taiwan operation. The independent service centers in Singapore and Brasil service customers in Singapore, Malaysia, Vietnam, Indonesia and South America, respectively.

#### **Quality Management System**

B&K Precision Corporation is an ISO9001 registered company employing traceable quality management practices for all processes including product development, service, and calibration.

ISO9001:2015

Certification body NSF-ISR Certificate number 6Z241-IS8

#### About Sefram

Established in 1947, Sefram has been designing and manufacturing data recorders for more than 70 years. Sefram joined the test and measurement division of Schlumberger in 1978, and has been a subsidiary of B&K Precision since 2004. Certified ISO 9001, Sefram's strategy is to provide innovative and high-quality test and measurement products for electronic and electrical applications.
