

# TV METERS Catalogue

The most innovative  
TV Meters for digital  
television

Designed and manufactured in our plant of Saint-Etienne (France)

7880-4k: A new family of TV Meters to meet the requirements of the XXI century !

**NEW**

H.265 4k decoding  
Weights less than 3Kg

**2** YEAR WARRANTY

**4K**  
ULTRAHD

10 inch panoramic touchscreen

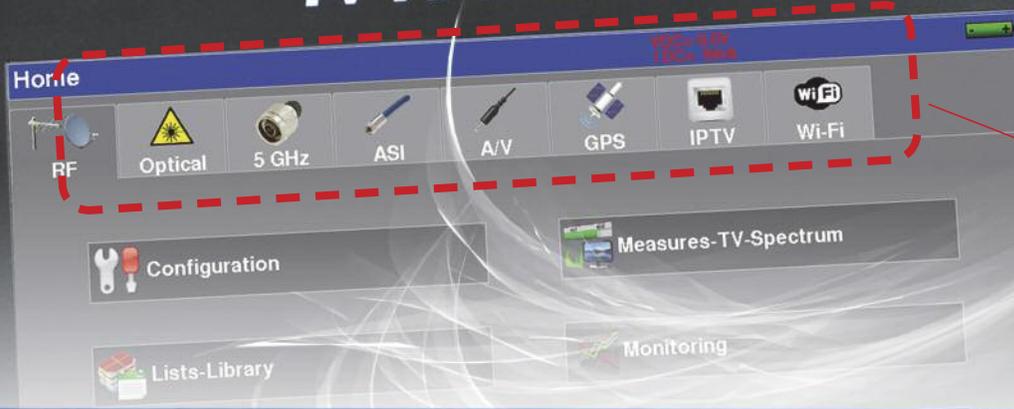

Rugged housing with protective bumps

- H.265 4k HDR
- DVB-C/C2 J83B
- DVB-T/T2 Lite
- Analogue TV
- DVB-S/S2, multistream
- Optical fiber
- IPTV
- DAB DAB+
- GPS
- WiFi
- FM-RDS
- ASI
- Network Delay analysis
- Shoulder
- TDMI via IP
- PVR

IPTV  
HD TV  
Multistream  
Optical fiber  
Digital radio  
GPS  
Shoulder

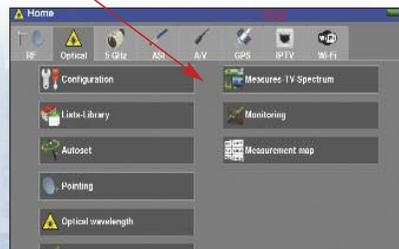

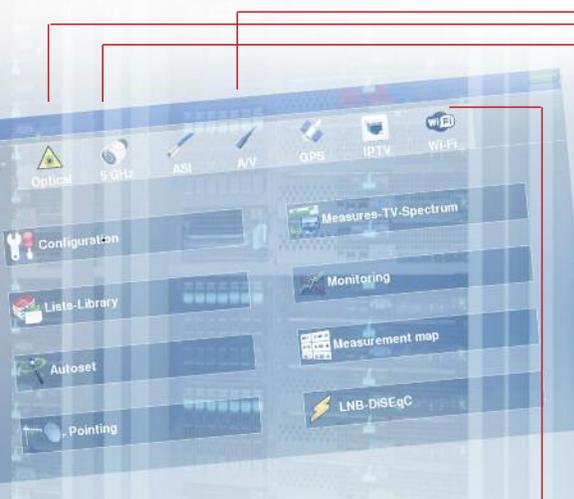

# Specific measurements: your TV Meter will meet all your needs

## TV ANALYSER

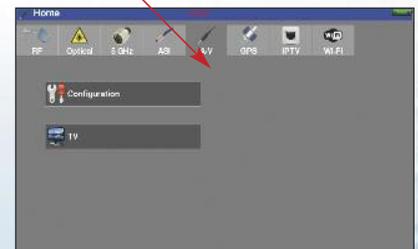

One menu bar to easily select the functions or the specific input

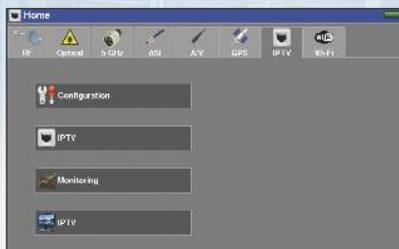

## Specific menus to save time

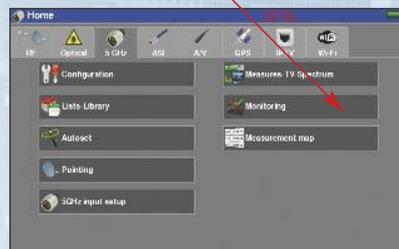

To qualify an optic fiber network for terrestrial, cable or satellite TV.

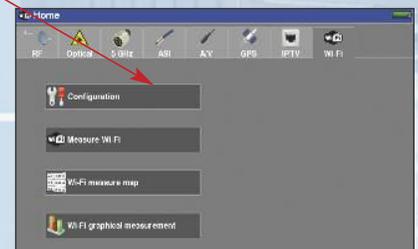

Some TV networks still use analogue programs: your TV analyser will provide the TV programs decoding and display. The analogue input / output are usefull to check signals from HD analogue cameras.

All necessary function to qualify your IPTV networks

The 5GHz input is dedicated to specific 5GHz LNB for satellite dishes.

WiFi networks can be analysed with specific functions and measurements.

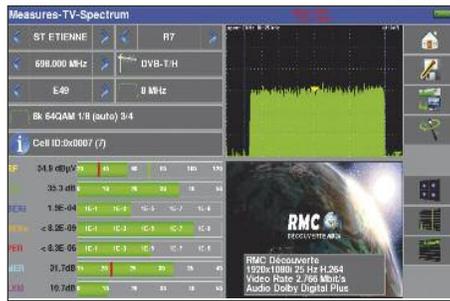

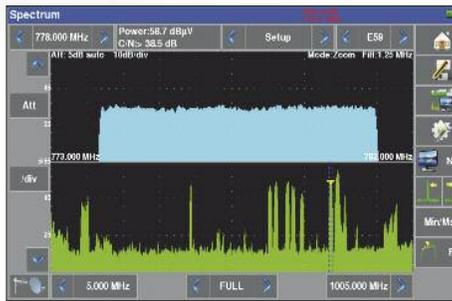

For head broadcasting stations, the ASI input / output will provide the transport stream analysis.

Using the internal GPS makes the mapping of a geographical area very easy and convenient.

Analyse and measure with the best accuracy

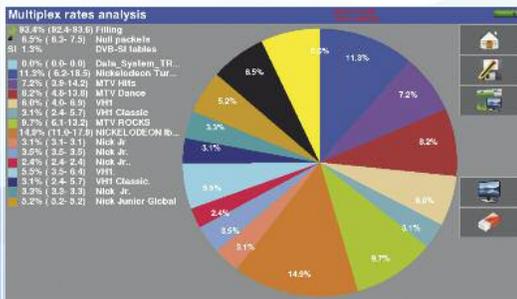

# TV ANALYSER

A zoom function is provided to check in detail TV signals and the quality of the TV installation.

A single screen with all necessary information

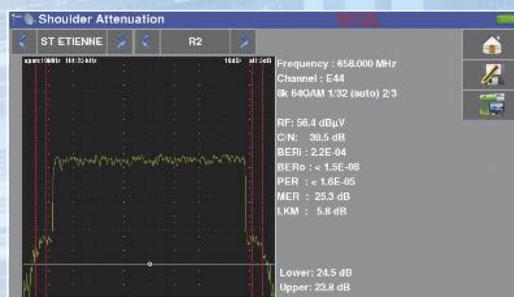

## MPEG-2 and MPEG-4 data flow analysis according to ETR 101-290

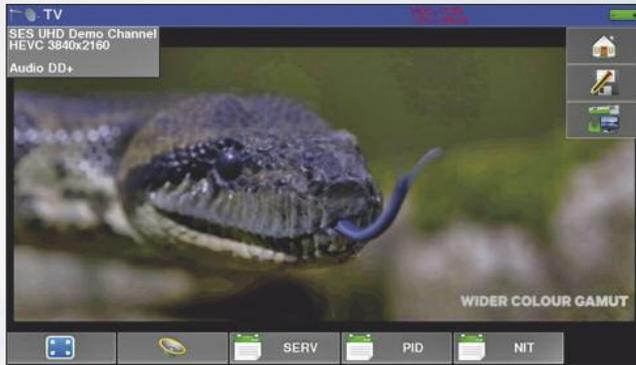

| Priority 1                     | Priority 2             | Priority 3                    |
|--------------------------------|------------------------|-------------------------------|
| 1.0 Necessary for decodability | 2.1 Transport_error    | 3.1 NIT_error                 |
| 1.1 TS_sync_error              | 2.2 CRC_error          | 3.2 table_id                  |
| 1.2 sync_byte_error            | 2.3 PCR_error          | 3.3 rate (-10%) actual        |
| 1.3 PAT_error                  | 2.4 PCR_accuracy_error | 3.4 rate (-10%) other         |
| 1.4 rate (+0.5s)               | 2.5 PTS_error          | 3.5 rate (-2%) actual         |
| 1.5 table_id                   | 2.6 CAT_error          | 3.6 rate (-2%) other          |
| 1.6 scrambling_error           | 2.7 no_CAT             | 3.7 table_id                  |
| 1.7 PID_error                  | 2.8 table_id           | 3.8 BIT_error                 |
|                                |                        | 3.9 rate (-2%) actual         |
|                                |                        | 3.10 rate (-2%) other         |
|                                |                        | 3.11 table_id                 |
|                                |                        | 3.12 rate (-2%) actual        |
|                                |                        | 3.13 rate (-2%) other         |
|                                |                        | 3.14 repetition_error (-20ms) |
|                                |                        | 3.15 unreferenced_PID         |
|                                |                        | 3.16 SOF_error                |
|                                |                        | 3.17 rate (-2%) actual        |
|                                |                        | 3.18 rate (-2%) other         |
|                                |                        | 3.19 table_id                 |
|                                |                        | 3.20 RST_error                |
|                                |                        | 3.21 TDT_error                |
|                                |                        | 3.22 rate (-30%)              |
|                                |                        | 3.23 table_id                 |

Checking the content of the multiplex data flow is now possible with log file capability.

## Shoulder measurement for DVB-T and DVB-T2 reception

# Today's and tomorrow's measurements

**H.265  
4k HDR**

Decoding and display of H.265 (4k) UHD TV programs

**IPTV**

The ideal tool to test your IPTV network: hotels, hospitals, industry,...

**Optical  
Fiber**

All measurements for optic fiber are provided

**DAB  
DAB+**

**FM-RDS**

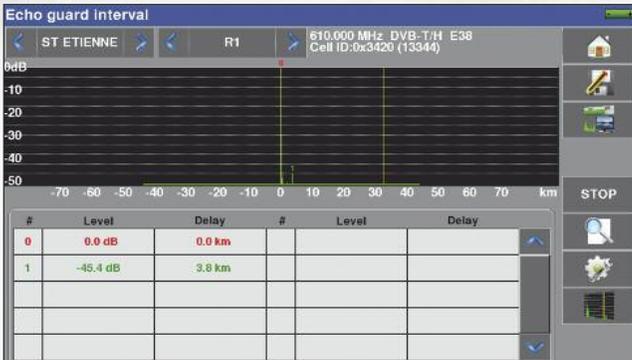

DAB, DAB+, FM with RDS analysis is provided. Stereo sound is available with headphone output.

# All necessary measurements

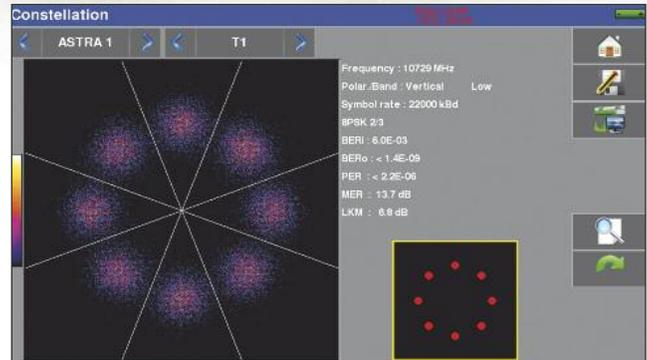

## TV ANALYSER

### Real time echoes and impulse response

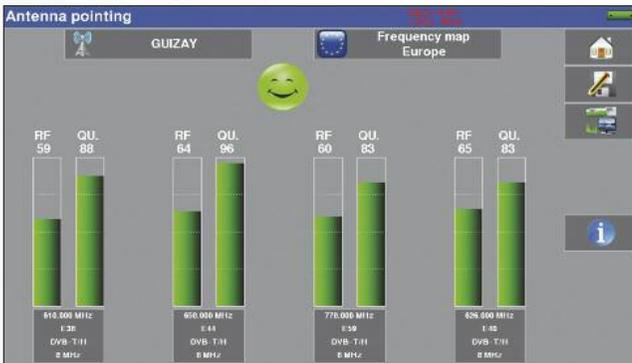

Real time echoes and pre-echoes

### Constellation diagram

Display of the constellation diagram for all digital standards

### Antenna pointer

A dedicated function to save time: check sat mode and pointing function for terrestrial.

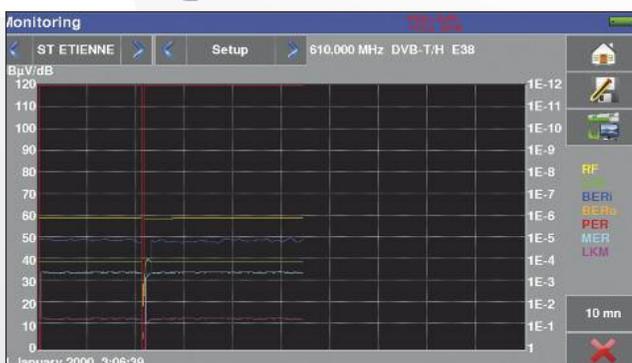

### Measurement map

| freq.    | std     | RF   | C-N   | BERI    | BERo     | PER      | MER  | LKM  |
|----------|---------|------|-------|---------|----------|----------|------|------|

## Select the most appropriate solution to protect and carry your TV analyser

*This carrying bag is supplied as standard accessory P/N 978851000*

*The rugged transport case is optional P/N: 978852000*

*Car cigar lighter converter P/N: 978361000*

*Audio-video cable P/N: 978853000*

*The sun protector is standard for all models. You can work in the best conditions using this protector.*

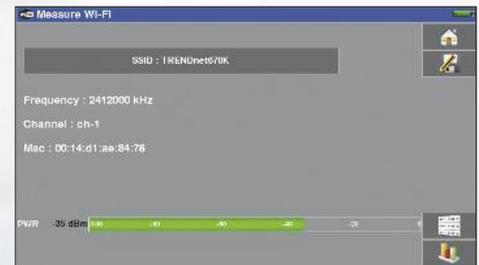

Remote control your TV analyser: it will make everything you desire!

The GPS provides a very powerful mapping function for the signals received

Check all WiFi networks working with 2,4GHz or 5,0GHz

Network Delay analysis for DVB-T Reception

# SEFRAM 7848B: TV Meter for digital terrestrial and digital satellite TV

## The ideal companion for the installer

The SEFRAM 7848B has been designed to ease the installation of terrestrial and satellite antennas : we have optimized the man-machine interface, taking the best benefit of the touch screen, to ease the process and save time.

7 inch touchscreen

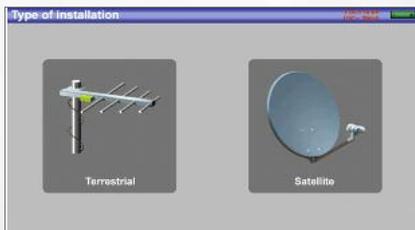

Wide Band

Analogue video input

DVB-S2X

Rugged metal housing with protective bumpers

Choice between terrestrial and satellite.

A detailed menu is provided for each type of installation.

New terrestrial pointing function, with the name of multiplex found.

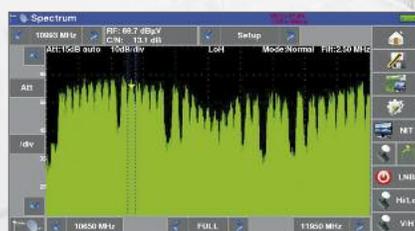

In satellite mode, the checksat provides the NIT. No error possible!

All measurements are displayed with a clear color set: green if measurement is OK, red if measurement is off limits.

Display of free-to-air SD and HD programs.

Simplified spectrum analysis.

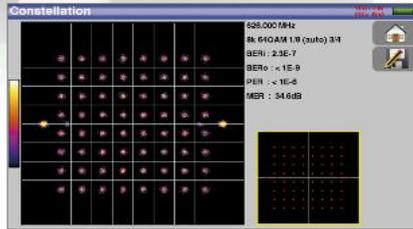

# Sefram 7849B: TV Meter for digital terrestrial, cable and satellite TV

A single screen for all measurements and spectrum.

## Sefram 7940

### Optical power meter

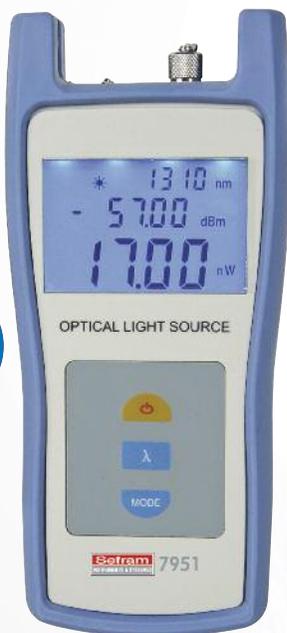

- Optical power measurement in dBm or mW
- 5 wavelengths available: 850nm, 980nm, 1300nm, 1550nm
- Insertion loss measurement
- Panoramic LCD with backlight
- Auto power-off

### Specifications

|            |                                    |
|------------|------------------------------------|
| Display    | graphical LCD with backlight       |
| Wavelength | 850, 980, 1300, 1310, 1550nm       |
| Dynamic    | -50 to +26 dBm                     |
| Accuracy   | linear: 0.1% - non linear: 0.01dBm |

**Supplied with:** batteries, manual, protective holster, carrying pouch, connectors.

## Sefram 7951

### Optical light source

- Provides 2 wavelengths for single mode fiber
- Modulated output
- Compact housing with protective holster
- Easy-to-use

### Specifications

|               |                              |
|---------------|------------------------------|
| Display       | graphical LCD with backlight |
| Wavelength    | 1310nm, 1550nm               |
| Modulation    | 270Hz, 1kHz, 2kHz            |
| Output power: | -7 dBm                       |

**Supplied with:** batteries, manual, protective holster, carrying pouch, connectors.

**Sefram 7951M:** Provides 2 wavelengths (850 and 1300 nm) for multi-mode fiber

## Sefram 7950

### Visual fault finder

- Low cost solution for testing the continuity of fibers
- Laser source with 650nm (visible)
- CW or pulse mode
- Robust metal case

### Specifications

|                   |               |
|-------------------|---------------|
| Output wavelength | 650 +/- 10 nm |
| Output power      | 3mW           |
| Pulse mode        | 2-3 Hz        |

**Supplied with:** batteries, manual, carrying pouch

Optical fiber not supplied

## Sefram customer support

## Technical support

Our technical support team is ready to help you to get the most out of all of our Sefram products. We will answer all your technical questions:

- Help to start with your instrument
- Technical information on products
- Software install and setup
- Selection of products for specific applications

Contact us: +33.(0)4.77.59.36.97 or +33.(0)4.77.59.36.82

### Free software updates for all Sefram products

Our website provides the latest embedded software for all products. Please browse our website to check the latest updates for your products.

[www.sefram.com](http://www.sefram.com)

## Sefram's Services:

To contact our after-sales department by e-mail: [services@sefram.com](mailto:services@sefram.com)

To ship back material for calibration or repair:

SEFRAM - SAV - 32, rue Edouard Martel BP 55 - F42009 SAINT-ETIENNE Cedex 2 - France.

To ease the receipt, we ask you to download from our website and fill the RMA as indicated on the PDF.

The RMA filled should be inserted in the parcel with the product returned (one RMA per product).

## Using SEFRAM's services, you will:

- Get the best price for repair and maintenance
- Get a quote in a very short period of time
- Get a warranty for your repair or upgrade

Sefram is also:

Do not hesitate to ask for our Data acquisition solution catalogue
